The Routledge Companion to Accounting Communication Jun 12 2021 One of the prime purposes of accounting is to communicate and yet, to date, this fundamental aspect of the discipline has received relatively little attention. The Routledge Companion to Accounting Communication represents the first collection of contributions to focus on the power of communication in accounting. The chapters have a shared aim of addressing the misconception that accounting is a purely technical, number-based discipline by

highlighting the use of narrative, visual and technological methods to communicate accounting information. The contents comprise a mixture of reflective overview, stinging critique, technological exposition, clinical analysis and practical advice on topical areas of interest such as: The miscommunication that preceded the global financial crisis The failure of sustainability reporting The development of XBRL How to cut clutter With an international coterie of contributors, including a communication theorist, a Big Four practitioner and accounting academics, this volume

provides an eclectic array of expert analysis and reflection. The contributors reveal how accounting communications represent, or misrepresent, the financial affairs of entities, thus presenting a state-of-the-art assessment on each of the main facets of this important topic. As such, this book will be of interest to a wide range of readers, including: postgraduate students in management and accounting; established researchers in the fields of both accounting and communications; and accounting practitioners.

Martin Gilbert, Learning & Development Lead in Mental Health, Birmingham City Council, UK **National planning policy framework 2012** Dec 06 2020 The National Planning Policy Framework 2012 sets out the Government's planning policies for England in achieving sustainable development and how these are expected to be applied. It sets out the requirements for the planning system only to the extent that it is relevant, proportionate and necessary to do so. It provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans, which reflect the needs and priorities of their communities. This Framework does not contain specific policies for nationally significant projects for which particular considerations apply. Divided into thirteen chapters, with three annexes, it looks at the following areas, including: building a competitive economy; ensuring town centre vitality; supporting a high quality communications infrastructure; delivering high quality homes; protecting the Green Belt; meeting the challenges of climate change, flooding and coastal change; conserving the natural and historic environments and facilitating the sustainable use of minerals. Evaluation of PEPFAR Aug 02 2020 The U.S. government supports programs to combat global HIV/AIDS through an initiative that is known as the President's Emergency Plan for

AIDS Relief (PEPFAR). This initiative was originally authorized in the U.S. Leadership Against HIV/AIDS, Tuberculosis, and Malaria Act of 2003 and focused on an emergency response to the HIV/AIDS pandemic to deliver lifesaving care and treatment in low- and middle-income countries (LMICs) with the highest burdens of disease. It was subsequently reauthorized in the Tom Lantos and Henry J. Hyde U.S. Global Leadership Against HIV/AIDS, Tuberculosis, and Malaria Reauthorization Act of 2008 (the Lantos-Hyde Act). Evaluation of PEPFAR makes recommendations for improving the U.S. government's bilateral programs as part of the U.S. response to global HIV/AIDS. The overall aim of this evaluation is a forward-looking approach to track and anticipate the evolution of the U.S. response to global HIV to be positioned to inform the ability of the U.S. government to address key issues under consideration at the time of the report release.

Clinical Practice Guidelines We Can Trust Jan 19 2022 Advances in medical, biomedical and health services research have reduced the level of uncertainty in clinical practice. Clinical practice guidelines (CPGs) complement this progress by establishing standards of care backed by strong scientific evidence. CPGs are statements that include recommendations intended to optimize patient care. These statements are informed by a systematic review of evidence and an assessment of the benefits and costs of alternative care options. Clinical Practice Guidelines We Can Trust examines the current state of clinical practice guidelines and how they can be improved to enhance healthcare quality and patient outcomes. Clinical practice guidelines now are ubiquitous in our healthcare system. The Guidelines International Network (GIN) database currently lists more than 3,700 guidelines from 39 countries. Developing guidelines presents a number of challenges including lack of transparent methodological practices, difficulty reconciling conflicting guidelines, and conflicts of interest. Clinical Practice Guidelines We Can Trust explores questions surrounding the quality of CPG development processes and the establishment of standards. It proposes eight standards for developing trustworthy clinical

practice guidelines emphasizing transparency; management of conflict of interest ; systematic review--guideline development intersection; establishing evidence foundations for and rating strength of guideline recommendations; articulation of recommendations; external review; and updating. Clinical Practice Guidelines We Can Trust shows how clinical practice guidelines can enhance clinician and patient decision-making by translating complex scientific research findings into recommendations for clinical practice that are relevant to the individual patient encounter, instead of implementing a one size fits all approach to patient care. This book contains information directly related to the work of the Agency for Healthcare Research and Quality (AHRQ), as well as various Congressional staff and policymakers. It is a vital resource for medical specialty societies, disease advocacy groups, health professionals, private and international organizations that develop or use clinical practice guidelines, consumers, clinicians, and payers.

Guide to Reporting under the Water Convention and as a Contribution to SDG Indicator 6.5.2

Mar 21 2022 The guide to reporting supports countries in reporting on transboundary water cooperation for the reporting on SDG indicator 6.5.2 and under the Water Convention. The primary aim of the guide is to enhance the quality of national reports, which will ultimately strengthen their usefulness in informing decision-making and policy-making processes

related to transboundary water cooperation at the national, basin or aquifer, regional and global levels. More specifically, the guide explains how the reporting template for reporting might be completed. It clarifies key terminology and provides practical examples of how certain questions might be answered. In addition, the guide offers guidance on how to organize the reporting process and how to utilize reporting to maximize its impact. The guide is therefore designed as a practical document for government experts who have the responsibility for conducting the reporting process and completing the template. The guide to reporting was formally requested (decision VIII/3) by the Meeting of the Parties to the Water Convention at its eight session (Nur-Sultan, 10-12 October 2018).

Cochrane Handbook for Systematic Reviews of Interventions May 23 2022 Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and

synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

It takes you through the entire research process, from designing the project to presenting the results and will help you execute high quality quantitative research that improves and informs clinical practice. Written by a team of research experts, this book covers common practical problems such as applying theory to

research and analysing data. It also includes chapters on communicating with ethics committees, recruiting samples from vulnerable populations, audit as a research approach, quasi-experimental designs and using cognitive interviewing, making it a new and innovative offering for health researchers. Other topics covered in this book include: Ethical considerations of research Designing and planning quantitative research projects Data measurement and collection Analyzing and presenting results With a strong practical focus, each chapter features examples of real-life research to illustrate the quantitative research process, as well as tips and insights into research planning and execution. This book is an essential guide for all health care professionals undertaking a postgraduate degree, as well as health researchers and practitioners who need to carry out research as part of their professional role. Contributors: Ruth Belling, Michelle Butler, Catherine Comiskey, Siobhan Corrigan, Gloria Crispino, Orla Dempsey, Suzanne Guerin, Maree Johnson, Carmel Kelly, Elaine Lehane, Maria Lohan, Susan McLaren, Deirdre Mongan, Corina Naughton, Rhona O'Connell, Elaine Pierce, Gary Rolfe, Eileen Savage, Anne Scott, Emma Stokes, Roger Watson "Learning quantitative research is taken much for granted. This is probably why there are fewer generic books on quantitative than qualitative research. This book is long overdue. Clearly-written and well structured, it takes us through

the whole journey of a research project from developing 'research questions' to 'presenting the findings', passing through philosophical underpinnings, recruitment of participants and ethical considerations. Written by an array of well-known researchers and teachers, this book will certainly appeal to new as well as seasoned researchers. Those who will use it, will not be disappointed." Kader Parahoo, University of Ulster "The title of this text is somewhat misleading. It is not only an excellent and thorough guide to qualitative health research methods; it is also an excellent introduction to all forms of qualitative research. It takes the reader gently through theoretical and ethical concerns to the practicalities and benefits of utilising qualitative approaches. As such it is that rare thing; a text that can be used by novice researchers to learn their craft, and a key reference resource for experienced research practitioners." Dr. John Cullen, School of Business, National University of Ireland, Maynooth, UK "This is a first-rate collection of essays that promotes an informed understanding of both underpinning principles and widely used techniques. A great deal of effort has clearly been invested in co-ordinating the contributions, and this has delivered clarity, complementarity and effective coverage. This is a welcome, carefully-crafted and very accessible resource that will appeal to students and researchers in healthcare and beyond." Handbook on the Use of Administrative Sources and Sample Surveys to Measure International Migration in CIS Countries Dec 18 2021 Migration is a powerful driver and important consequence of economic, political and social change, and there fore needs to be adequately measured and understood. However, the improvement of statistical systems to measure migration has been a slow process because of weak coordination between migration statistics producers, discrepancies in the applied definitions, and challenges related to data collection. The objective of this handbook is to guide statisticians and other professionals in producing and using data on international migration from administrative sources and household surveys in the CIS region. It describes the key concepts and definitions for the measurement of international migration. It also provides practical information on the sources of administrative data and their use,

and highlights the related methodological and organizational challenges.

[CSR reporting at Flughafen München GmbH](#) May 31 2020 Seminar paper from the year 2014 in the subject Communications - Media and Politics, Politic Communications, grade: 2,0, University of Applied Sciences Wildau (Wildau Institute of Technology), course: Aviation Management 2012, language: English, abstract: "Living Ideas - Connecting Lives" "We promote cooperative development with the region, assume responsibility for our employees, and create added value for our customers." This is the brand-new motto of the fresh corporate identity program of Flughafen München GmbH (FMG) introduced in January 2014. At the first glance it appears as a nice sounding slogan but there is more behind. It stands as a symbol of the entire Corporate Social Responsibility (CSR) strategy at Munich International Airport (MUC). It is CSR which has gained increasing importance in the global corporate environment mainly driven by changing expectations of the society towards the economy. And it is FMG which became a pioneer in CSR commitment and reporting of

airports very early. By the end of 2015, MUC intends to be the most sustainable airport of the world. Especially in regard of reporting on CSR the airport operator is already second to none and has ambitious plans in order to satisfy their multi-dimensional stakeholder interfaces in the future. This research paper is going to describe key elements of CSR reporting of airports and FMG in particular. The overall structure of this paper uses the annual "Perspectives 2012" report of FMG and additional company and airport industry related publications. After briefly introducing FMG as a company I will assess the CSR reporting practices of the airport operator in detail. An overview of the CSR reporting quality of FMG is given. Additionally, essential information are identified which shall be included in a publication in order to provide successful CSR reporting. In a second step I will now go into more detail by chronologically assessing the most current CSR report of FMG by highlighting and discussing specific topics. Furthermore I will describe the efforts of FMG to increase the social involvement of own employees by encouraging their interest in voluntary projects. Based on the findings, a conclusion emphasizing the importance of CSR in regard of public perception of FMG as a future-oriented airport operator is given.

Study Guide for the Psychiatry Board

Examination Feb 26 2020 Psychiatrists and residents are faced with the important -- but what may feel overwhelming -- task of refreshing their knowledge of the whole of psychiatric practice, typically while remaining engaged in full-time clinical activity. Psychiatrists will find the logical structure, substantive questions, and thorough explanations provided by the Study Guide for the Psychiatry Board Examination to be as reassuring as they are educational. Although readers are advised to consult a range of resources in preparation for the examination, this guide is indispensable. It is the first and only guide to reflect the revisions contained in DSM-5®, and it will ably assume a primary role in the study and review process. The guide is designed for maximum usefulness, with specific features and attributes to support knowledge recall and successful examination performance. * The authors are from a cross-section of accomplished students, fellows, and junior and senior faculty, all of whom have faced or will face the board examination and who

understand its importance to the profession.* Topics were determined by the American Board of Psychiatry and Neurology Certification Examination in Psychiatry 2015 Content Blueprint.* The approximately 400 questions were formulated from information extracted from widely available American Psychiatric Publishing textbooks and accurately reflect the accepted psychiatric knowledge base.* Each multiple choice question is followed by an explanation of why the correct answer is correct and the others are incorrect, and every question and explanation is referenced, directing the reader to the primary material for more in-depth learning and study.* The volume was designed as a study guide for both the initial psychiatry board examination and the recertification examination. The process of working through the study guide will allow the reader to identify areas of strength and weakness, initiate further study, and test and retest knowledge, ultimately preparing for the examination's rigors. Only the Study Guide for the Psychiatry Board Examination offers support for the new, DSM-5® -- compatible examination, and that alone renders it essential.

Registries for Evaluating Patient Outcomes Nov 05 2020 This User's Guide is intended to support the design, implementation, analysis, interpretation, and quality evaluation of registries created to increase understanding of patient outcomes. For the purposes of this guide, a patient registry is an organized system

that uses observational study methods to collect uniform data (clinical and other) to evaluate specified outcomes for a population defined by a particular disease, condition, or exposure, and that serves one or more predetermined scientific, clinical, or policy purposes. A registry database is a file (or files) derived from the registry. Although registries can serve many purposes, this guide focuses on registries created for one or more of the following purposes: to describe the natural history of disease, to determine clinical effectiveness or cost-effectiveness of health care products and services, to measure or monitor safety and harm, and/or to measure quality of care. Registries are classified according to how their populations are defined. For example, product registries include patients who have been exposed to biopharmaceutical products or medical devices. Health services registries consist of patients who have had a common procedure, clinical encounter, or hospitalization. Disease or condition registries are defined by patients having the same diagnosis, such as cystic fibrosis or heart failure. The User's Guide was created by researchers affiliated with AHRQ's Effective Health Care Program, particularly those who participated in AHRQ's DEcIDE (Developing Evidence to Inform Decisions About Effectiveness) program. Chapters were subject to multiple internal and external independent reviews.
