have trouble reading, they don't have any problems learning; dyslexia has nothing to do with a lack of intellect. While other books tell you what dyslexia is, this book tells you what to do. Dyslexics' innate skills, which may include verbal, social, spatial, kinesthetic, visual, mathematical, or musical abilities, are their unique key to acquiring knowledge. Figuring out where their individual strengths lie, and then harnessing these skills, offers an entrée into learning and excelling. And by keeping the focus on learning, not on standard reading the same way everyone else does, a child with dyslexia can and will develop the self-confidence to flourish in the classroom and beyond. After years of battling with a school system that did not understand his dyslexia and the shame that accompanied it, renowned activist and entrepreneur Ben Foss is not only open about his dyslexia, he is proud of it. In *The Dyslexia Empowerment Plan* he shares his personal triumphs and failures so that you can learn from his experiences, and provides a three-step approach for success:

- Identify your child's profile: By mapping your child's strengths and weaknesses and assisting her to better understand who she is, you can help your child move away from shame and feelings of inadequacy and move toward creating a powerful program for learning.
- Help your child help himself: Coach your child to become his own best advocate by developing resiliency, confidence, and self-awareness, and focusing on achievable goals in areas that matter most to him.
- Create community: Dyslexic children are not broken, but too often the system designed to educate them is. Dare to change your school so that your child has the resources to thrive. Understanding your rights and finding allies will make you and your child feel connected and no longer alone. Packed with practical ideas and strategies dyslexic children need for excelling in school and in life, this empowering guide provides the framework for charting a future for your child that is bright with hope and unlimited potential. guide . . . This extremely practical and motivational book will be welcomed by parents of dyslexic children.”—Publishers Weekly (starred review) “Accessible and reassuring.”—Library Journal “This step-by-step guide will become a go-to resource for parents.”—James H. Wendorf, executive director, National Center for Learning Disabilities “I study dyslexia in the lab and am a parent of a wonderful daughter who fits this profile. Ben Foss’s book should be considered essential to any collection on the subject. It was extremely useful, especially for a mom.”—Maria Luisa Gorno Tempini, M.D., Ph.D., professor of neurology, UCSF, Memory and Aging Center “As someone with a learning profile that made school tough, and as a parent, I know kids need the right support. Ben Foss knows how to get access to education because he’s been through it. I was thrilled to read this book. It offers a wise collection of insights that are both practical and touching.”—James Gandolfini, actor, *The Sopranos*

**Proceedings of a Workshop to Review PATH Strategy, Operating Plan, and Performance Measures**

Oct 28 2022 The National Research Council's (NRC's) involvement with the Partnership for Advancing Technology in Housing (PATH) started in 2000 with a three-year review and assessment of the PATH program. The resulting report, Promoting Innovation: 2002 Assessment of the Partnership for Advancing Technology in Housing, included a series of recommendations regarding the focus of the PATH program's goals and the performance measures used to manage the program and assess progress in its formative years. Subsequently, the Department of Housing and Urban Development (HUD) asked the NRC to convene a workshop to assess PATH's most recent draft strategy, operating plan, and performance measures to determine their responsiveness to the recommendations in the 2002 Assessment and their suitability for guiding PATH into the future. This report outlines the workshop discussions, which focused on the three major PATH goals. Workshop participants discussed possible strategies for improving communication among all the players in housing and housing innovation, and commented on a number of questions: Do the goals of the PATH program convey a clear idea of what PATH is trying to achieve? Are the performance measures effective in assessing progress toward the goals? Do the goals and measures provide an adequate indication of innovation in the housing industry? This report concludes with a discussion that focuses on the path forward and how the goals and performance measures could be improved to increase the probability of the success and growth of PATH.

**No Place to Call Home** Aug 26 2022 Abstract: This publication reports the conclusions of a series of hearing concerning support and services for children in troubled families. The Congress has made a commitment to guarantee support in the form of out of home placement when necessary and reunification with their families when possible. This report sought to answer several questions including: are there fewer unnecessary placements of children out of their homes than previously occurred? When children must be placed, are there more effective permanent placements than there were ten years ago? Are children receiving quality services when they are entrusted to the child welfare system? Several failings of the system are revealed while some promising policies, innovative strategies, and effective programs were found.

focuses on the transformation from colonial to global - the formation, mechanism, events, works and people related to urban architecture. The book reveals hardships the city encountered in the 1950s and the glamour enjoyed in the 1980s. It depicts the public and private developments, and especially the public housing which has sheltered millions of residents. The author identifies the architects practising in the formative years and the representatives of a rising generation after the 1980s. Suffering from land shortage and a dense environment, the urban development of Hong Kong has in the past 70 years met the changing demands of fluctuating economic activities and a rising population. Architecture on the island has been shaped by social demands, the economy and technology. The buildings have been forged by the government, clients, planners, architects, many contractors and end-users. The built environment nurtures our life and is visual evidence of the way the city has developed. Hong Kong is a key to East Asia in the Pacific Era. The book is a must-read for a thorough understanding the contemporary history and architecture of this oriental pearl. Endorsement: "Hong Kong sets an extreme example of hyper-density living. MTR's Kowloon Station project offered my firm the unique opportunity to contribute to a new type of fully integrated three dimensional transport mega-structure, conceived as a well-connected place for people to live, work and play. Through Charlie Xue's book, one can see how a compact city works and high density integrated development indicates a sustainable path for modern city making." Sir Terry Farrell, CBE, Principal, Farrells "Well researched and refreshingly well structured, Charlie Xue's latest book comprehensively shows how Hong Kong's post-war urban architecture both tracks and symbolizes the former British colony's rise to success - a must read for architecture and culture buffs alike." Peter G. Rowe, Raymond Garbe Professor of Architecture and Urban Design, Harvard University Distinguished

on Chinese architecture, the title of the book belies the full scope of Xue's extensive history. Covering Hong Kong's postwar transition from defeated colony to Pacific Age power house, Xue expertly traces the evolution of the city's ambitious and innovative programs of integrated high density urban design and infrastructure, as well as changing architectural fashions. In a time when many Western governments have all but abandoned public housing programs, Xue's book is a timely reminder of what can be achieved."
