Geography Education Research in the UK: Retrospect and Prospect Nov 03 2020 This book provides a unique assessment of the development of research in geography education and its future prospects, offering a challenging critique of subject-based education research, with particular reference to geography education across a range of different jurisdictions. It covers a range of topics, including the changing role of research in geography education; the relationship between education research and professional practice, with special reference to geography education research; the place of academic subject knowledge in geography education research; critiques of the functions of research in geography education; and the key issues for education policy and policymakers concerning educational research at national and international levels. Importantly, in a period marked by radical change for education research and researchers, the book offers a timely appraisal of possible ways forward for geography education research. Addressing the needs of academics, research students, policymakers, and education practitioners who undertake, use or shape the future of research in geography education, it comprehensively explores the forces that have driven the development of geography education research and pedagogy. Further, by positioning its analysis in the context of education policy debates in the UK, and further afield, it assesses the role and function of research in education, and offers an outlook on its future. This book is essential reading for all those who wish to understand the sporadic and increasingly uncertain development of subject-based research in education

schools, educational policies addressing English language learning are becoming increasingly significant. Popular and governmental beliefs regarding the education of these pupils have resulted in de facto language policies which largely reflect political, rather than linguistic, realities. In such a situation, it is vital to analyse the development of these policies and their implementation at the school level. This book consists of case studies of two primary schools, one in England and one in the United States, which help to illuminate how teachers and schools serving highly diverse linguistic and ethnic populations function within broader language policy directives. Special attention is given to teachers' and administrators' perceptions of the factors that hamper or facilitate the implementation of these initiatives. The major findings are presented in a comparative context, drawing upon theory and empirical evidence to examine the manner in which internal, social and political pressures affect policy implementation.

Contemporary Meanings in Physical Geography Apr 27 2020 Over the past twenty years, geography as an academic discipline has become more and more reflective, asking the key questions 'What are we doing?' 'Why are we doing it?'. These questions have, so far, been more enthusiastically taken up by human geography rather than physical geography. Contemporary Meanings in Physical Geography aims to redress the balance. Written and edited by a distinguished group of physical geographers, Contemporary Meanings in Physical Geography comprises a collection of international writer's thoughts which reveal personal motivations, and look at tensions in the worlds of meaning in which physical geography is involved. How are the meanings of the physical environment derived? Is the future of physical geography one where the only, or at least the dominant, meanings are framed in the contexts of environmental issues. Covering a diverse and lively selection of topics, the contributors of this book offer guides to the contemporary debates in the philosophy of physical geography, and introduce the reader to its wider cultural significance. This book is an essential companion to anyone studying, or with an interest in, physical geography.

Understanding World Regional Geography Apr 08 2021 Understanding World Regional Geography (UWRG) is a course designed to teach students to think and apply geographic concepts long after the course is over. Author Erin Fouberg draws from her expertise in geography education and research in student learning to create a product that has a strong pedagogical framework designed to engage students and deepen their understanding of the world by having them "DO" Geography. UWRG includes features that help students learn to read cultural and physical landscapes, ask geographic questions, apply geographic concepts, and make connections. It integrates 25 threshold concepts and teaches students how geographers apply these concepts and asks them to apply these concepts themselves. This enables them to grasp the complexities of the world and provides them with the knowledge and thinking skills necessary to understanding it. UWRG is the first introductory course to integrate ESRI ArcGIS Online thematic maps, enabling students to engage with course materials, see patterns, and answer geographic questions.

Junior Geography Kit Jun 10 2021 Emphasizes on the acquisition of skills, gathering and evaluating evidence and drawing conclusions, and making learning fun for the young geographer. Local and Regional Development Mar 27 2020 Actors and institutions in localities and regions across the world are seeking prosperity and well-being amidst tumultuous and disruptive shifts and transitions generated by: an increasingly globalised, knowledge-intensive capitalism; global financial instability, volatility and crisis; concerns about economic, social and ecological sustainability, climate change and resource shortages; new multi-actor and multi-level systems of government and governance and a re-ordering of the international political economy; state austerity and retrenchment; and, new and reformed approaches to intervention, policy and institutions for local and regional development. Local and Regional Development provides an accessible, critical and integrated examination of local and regional development theory, institutions and policy in this changing context. Amidst its rising importance, the book addresses the fundamental issues of 'what kind of local and regional development and for whom?', its purposes, principles and values, frameworks of understanding, approaches and interventions, and integrated approaches to local and regional development throughout the world. The approach provides a theoretically informed, critical analysis of contemporary local and regional development in an international and multi-disciplinary context, grounded in concrete empirical analysis from experiences in the global North and South. It concludes by identifying what might constitute holistic, inclusive, progressive and sustainable local and regional development, and reflecting upon its limits and political renewal.

Earthworks Oct 26 2022 Earthworks is a course for Key Stage 3 National Curriculum Geography offering flexible, enquiry-based investigations to suit all abilities. This is the third book in the series, and is divided into units which examine topics such as cities, energy resources, and earthquakes and volcanoes. There are four types of material in each unit: groundwork is stimulus material based on the pupils' own experience; framework material provides a range of single spread activities which investigate the essential concepts and skills required for the rest of the unit; the building blocks are a choice of in-depth enquiries into selected aspects of the topic; and Digging Deeper provides conceptually more demanding enquiries into issues. This title draws particularly from Africa and the Americas.

The Memoir of Joseph Pierce Braud, Md: His Life Journey on the Gravel Road and Beyond Jul 11 2021
4.18.22 This memoir highlights a compelling story of tragedy and triumph during the Jim Crow and separate but equal era of the Deep South. The book traces the evolution of Joseph Pierce Braud, from his humble birthplace in A-Bend in Ascension Parish to his graduation from Howard University Medical School in 1958 and thereafter. Braud overcame the death of his father and helped support the family by scrapping rice and potatoes and shining shoes on Carrollton Street in New Orleans. During the 1930s and 1940s, his family received only \$18 per month for seven siblings. Before earning his medical degree from Howard University Medical School in 1958, Braud helped his siblings obtain a college education. Subsequently, he opened his medical practice in New Orleans and held a staff position at Flint-Goodridge Hospital of Dillard University. From Brookstown with its 300 residents, Dr. Braud paved the way for six members of his Braud Family Group to become Medical Doctors, including (14) BS degrees, (4) Masters Degrees, (1) Juris Doctorate, (1) Doctor of Philosophy, and (1) nurse. Find out how Braud beat the odds to earn his education and pave the way for other Blacks to enter the medical field.

Carceral Geography Dec 24 2019 The 'punitive turn' has brought about new ways of thinking about geography and the state, and has highlighted spaces of incarceration as a new terrain for exploration by geographers. Carceral geography offers a geographical perspective on incarceration, and this volume accordingly tracks the ideas, practices and engagements that have shaped the development of this new and vibrant subdiscipline, and scopes out future research directions. By conveying a sense of the debates, directions, and threads within the field of carceral geography, it traces the inner workings of this dynamic field, its synergies with criminology and prison sociology, and its likely future trajectories. Synthesizing existing work in carceral geography, and exploring the future directions it might take, the book develops a notion of the 'carceral' as spatial, emplaced, mobile, embodied and affective.

Insight Turkey 2015? ?- Fall 2015 (Vol. 17, No. 4) May 29 2020 Last year was the year of elections in Turkey with two parliamentary elections and months-long electoral campaigns that dominated the political agenda of the country. The parliamentary elections of June 7, 2015 brought an end to the AK Party's 12-year long era of parliamentary majority and single-party government in Turkey. Nevertheless, the endeavors to form a coalition government could not be concluded successfully and another election appeared on the horizon. The country was ruled by an AK Party-led interim government and the elections were repeated five months later on November 1, 2015. While close in time, the two elections were quite distant with regard to the political contexts in which they were carried out, and in their respective results. The November elections witnessed a comeback for the AK Party, which increased its votes by over 9 points with the addition of five million new votes in the ballot box.

Current Topics in Czech and Central European Geography Education Sep 25 2022 This book discusses current challenges related to teaching geography, mainly at the secondary school and higher education level. Focusing on a range of current topics, different methods, techniques, materials, applications, and approaches to geography education with a regional Central European perspective, the book makes an original contribution to the field. Most of the chapters aims at the practical development of the themes such as geography curriculum (Part I), global education, inquiry-based education, project-based learning, case studies, powerful teaching (Part II), using of information and communication technologies (Part III) in geography teaching. The final part (Part IV) covers some geopolitical, and socio-geographical aspects of the aforementioned Central European former communist countries from the point of view how to teach them with various methods. Therefore, the book can appeal to many geography or science students, researchers and educators studying geography education around the world.

Archeologia e Calcolatori. Supplemento 6. 2014. ARCHEOSEMA. Artificial Adaptive Systems for the Analysis of Complex Phenomena. Collected Papers in Honour of David Leonard Clarke Dec 04 2020 ARCHEOSEMA, a meta-disciplinary project of theoretical, analytical and experimental archaeology, has been recently awarded by La Sapienza University of Rome. The project title is an acronym which sums up its two main theoretical

foundations: the openness of modern archaeology (ARCHEO) to the analysis of physical, historical, linguistic signs (SEMA) underlying natural and cultural systems reconstructed and simulated through Artificial Sciences. This volume edited by Marco Ramazzotti, a Supplement to «Archeologia e Calcolatori», is a Special Issue dedicated to the memory of the English archaeologist David Leonard Clarke (1937-1976), and is a further attempt to collect some applicative studies of complex natural and cultural phenomena following the Artificial Intelligence computational models through the lens of Analytical Archaeology.

Learning to Teach Geography in the Secondary School May 09 2021 Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching, and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum, as well as to initial teacher education, the new edition considers the current debates around what we mean by geographical knowledge, and what's involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography: Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school-based initial teacher education in mind, Learning to Teach Geography in the Secondary school is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of Learning to Teach Geography in the Secondary School... 'This is a practical and visionary book, as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative, conceptual framework.' - The Times Educational Supplement 'This is a modern, powerful, relevant and comprehensive work...a standard reference for many beginning teachers on geography initial teacher training courses.' - Educational Review

The World between Empires Feb 06 2021 The World between Empires presents a new perspective on the art and culture of the Middle East in the years 100 B.C.–A.D. 250, a time marked by the struggle for control by the Roman and Parthian Empires. For the first time, this book weaves together the cultural histories of the cities along the great incense and silk routes that connected southwestern Arabia, Nabataea, Judaea, Syria, and Mesopotamia. It captures the intricate web of influence and religious diversity that emerged in the Middle East through the exchange of goods and ideas. And for our current age, when several of the archaeological sites featured here—including Palmyra, Dura- Europos, and Hatra—have been subject to deliberate destruction and looting, it addresses the crucial subject of preserving what has been lost and contextualizes the significance of these works on a local and global scale. This essential volume features 186 objects of exceptional importance from Europe, the Middle East, and the United States. Readers are taken on a fascinating journey that explores sites of intense political and religious struggles against Roman rule as well as important religious centers and military bulwarks of the Parthian Empire. Reaching across two millennia, The World between Empires brings vividly to life how individuals and cities in ancient times defined themselves, and how these factors continue to resonate today. p.p1

Wild Life Sep 13 2021 Wild Life documents a nuanced understanding of the wild versus captive divide in species conservation. It also documents the emerging understanding that all forms of wild nature—both in situ (on-site) and ex situ (in captivity)—may need to be managed in perpetuity. Providing a unique window into the high-stakes world of nature conservation, Irus Braverman describes the heroic efforts by conservationists to save wild life. Yet in the shadows of such dedication and persistence in saving the life of species, Wild Life also finds sacrifice and death. Such life and death stories outline the modern struggle to define what conservation should look like at a time when the long-established definitions of nature have collapsed. Wild Life begins with the plight of a tiny endangered snail, and ends with the rehabilitation of an entire island. Interwoven between its pages are stories about golden lion tamarins in Brazil, black-footed ferrets in the American Plains, Sumatran rhinos in Indonesia, Tasmanian devils in Australia, and many more creatures both human and nonhuman. Braverman draws on interviews with more than one hundred and twenty conservation biologists, zoologists, zoo professionals, government officials, and wildlife managers to explore the various perspectives on in situ and ex situ conservation and the blurring of the lines between them.

The Ancient Israelite World Sep 01 2020 This volume presents a collection of studies by international experts on various aspects of ancient Israel's society, economy, religion, language, culture, and history, synthesizing archaeological remains and integrating them with discussions of ancient Near Eastern and biblical texts. Driven by theoretically and methodologically informed discussions of the archaeology of the Iron Age Levant, the 47 chapters in The Ancient Israelite World provide foundational, accessible, and detailed studies in their respective topics. The volume considers the history of interpretation of ancient Israel, studies on various aspects of ancient Israel's society and history, and avenues for present and future approaches to the ancient Israelite world. Accompanied by over 150 maps and figures, it allows the reader to gain an understanding of key issues that archaeologists, historians and biblical scholars have faced and are currently facing as they attempt to better understand ancient

Israelite society. The Ancient Israelite World is an essential reference work for students and scholars of ancient Israel and its history, culture, and society, whether they are historians, archaeologists or biblical scholars.
