Winners Take All Oct 31 2022 NEW YORK TIMES BESTSELLER • The groundbreaking investigation of how the global elite's efforts to "change the world" preserve the status quo and obscure their role in causing the problems they later seek to solve. An essential read for understanding some of the egregious abuses of power that dominate today's news. "Impassioned.... Entertaining reading." —The Washington Post Anand Giridharadas takes us into the inner sanctums of a new gilded age, where the rich and powerful fight for equality and justice any way they can—except ways that threaten the social order and their position atop it. They rebrand themselves as saviors of the poor; they lavishly reward "thought leaders" who redefine "change" in ways that preserve the status quo; and they constantly seek to do more good, but never less harm. Giridharadas asks hard questions: Why, for example, should our gravest problems be solved by the unelected upper crust instead of the public institutions it erodes by lobbying and dodging taxes? His groundbreaking investigation has already forced a great, sorely needed reckoning among the world's wealthiest and those they hover above, and it points toward an answer: Rather than rely on scraps from the winners, we must take on the grueling democratic work of building more robust, egalitarian institutions and truly changing the world—a call to action for elites and everyday citizens alike.

All Or Nothing Feb 20 2022 German and Italian fascist armies in the Second World War treated the Jews quite differently. Jews who fell into the hands of the German army ended up in concentration camps; none of those taken by the Italians suffered the same fate. Yet the protectors of the Jews were no philo-Semites, nor were they (often) great respecters of human life. Some of those same officers had sanctioned savage atrocities against Ethiopians and Arabs in the years before the war. Jonathan Steinberg uses this remarkable and poignant story to unravel the motives and forces underpinning both Fascism and Nazism. As a renowned historian of both Germany and Italy, he is uniquely placed to answer the underlying question; why?

All Positive Action Starts with Criticism Apr 12 2021 This study provides a historical analysis of Freudenthal's didactic ideas and his didactic career. It is partly biographical, but also contributes to the historiography of mathematics education and addresses closely related questions such as: what is mathematics and where does it start? Which role does mathematics play in society and what influence does it have on the prevailing views concerning its accompanying didactics?. Hans Freudenthal (1905–1990), professor in mathematics, scientist, literator, but above all mathematics-educator, was inextricably linked to the changes which took place in mathematics education and didactics during the second half of the last century. His diversity as a scientist and his inexhaustible efforts to establish the didactics of mathematics as a seriously pursued science, made Freudenthal's influence in this area considerable. He foresaw an essential, practical role for mathematics in everyone's life, encouraging students to discover and create mathematics themselves, instead of imposing a ready-made mathematical system. The theory of mathematics education thus developed in the Netherlands would gain world fame in the following decades. Today, in the light of the discussions about mathematics education, in which the call for 'genuine' mathematics instead of the so-called 'kindergarten'-mathematics can be heard, Freudenthal's approach seems to be passé. However, the outcome of this study (which is mainly based on documents from Freudenthal's vast personal archive) shows a more refined picture. The direct identification of 'kindergarten'-mathematics with Freudenthal's view on mathematics education is not justified. 'Realistic mathematics' as advocated by Freudenthal includes more than just a practical introductory and should, among other things, always aim at teaching 'genuine' mathematics in the end.

Art in the Age of Anxiety May 02 2020 Artists and writers examine the bombardment of information, misinformation, emotion, deception, and secrecy in online and offline life in the post-digital age. Every day we are bombarded by information, misinformation, emotion, deception, and secrecy in our online and offline lives. How does the never-ending flow of data affect our powers of perception and decision making? This richly illustrated and boldly designed collection of essays and artworks investigates visual culture in the post-digital age. The essays, by such leading cultural thinkers as Douglas Coupland and W. J. T. Mitchell, consider topics that range from the future of money to the role of art in a post-COVID-19 world; from mental health in the digital age to online grieving; and from the mediation of visual culture to the thickening of the digital sphere. Accompanying an ambitious exhibition conceived by the Sharjah Art Foundation and volume editor and curator Omar Kholeif, the book is a work of art and a labor of love, emulating the labyrinthine corridors of the exhibition itself. Created by a group of writers, artists, designers, photographers, and publishers, *Art in the Age of Anxiety* calls upon us to consider what our collective future will be and how humanity will adapt to it.

Does the Richness of the Few Benefit Us All? Feb 29 2020 It is commonly assumed that the best way to help the poor out of their misery is to allow the rich to get richer, that if the rich pay less taxes then all the rest of us will be better off. Yet these commonly held beliefs are flatly contradicted by our daily experience, research findings, and logic. Bauman scrutinises the assumptions and convictions upon which such opinions are grounded, finding them one by one to be false, deceitful and misleading.
