The Princeton Guide to Historical Research Sep 05 2020 The essential handbook for doing historical research in the twenty-first century The Princeton Guide to Historical Research provides students, scholars, and professionals with the skills they need to practice the historian's craft in the digital age, while never losing sight of the fundamental values and techniques that have defined historical scholarship for centuries. Zachary Schrag begins by explaining how to ask good questions and then guides readers step-by-step through all phases of historical research, from narrowing a topic and locating sources to taking notes, crafting a narrative, and connecting one's work to existing scholarship. He shows how

researchers extract knowledge from the widest range of sources, such as government documents, newspapers, unpublished manuscripts, images, interviews, and datasets. He demonstrates how to use archives and libraries, read sources critically, present claims supported by evidence, tell compelling stories, and much more. Featuring a wealth of examples that illustrate the methods used by seasoned experts, *The Princeton Guide to Historical Research* reveals that, however varied the subject matter and sources, historians share basic tools in the quest to understand people and the choices they made. Offers practical step-by-step guidance on how to do historical research, taking readers from initial questions to final publication Connects new digital technologies to the traditional skills of the historian Draws on hundreds of examples from a broad range of historical topics and approaches Shares tips for researchers at every skill level

Historical Dictionary of Liberia Oct 26 2019 Originally formed to harbor freed slaves and Americans returning to Africa, Liberia once was a land of hope. That was shattered by a long Civil War that shook its very foundation. Today's Liberia is glimpsed in this second edition. Building on the first edition, this updated volume focuses on the personalities, from the founders of Liberia, to the soldiers who are responsible simultaneously for destruction and the hope of stability. Along with these people, various social and ethnic groups, political parties and labor movements, economic entities and natural resources are profiled in this updated work. A new chronology of Liberia is included, and a selected bibliography

suggests further readings for the scholar.

Research Methods for History Feb 08 2021 Historians have become increasingly sensitive to social and cultural theory since the 1980s, yet the actual methods by which research is carried out in History have been largely taken for granted. Research Methods for History encourages those researching the past to think creatively about the wide range of methods currently in use, to understand how these methods are used and what historical insights they can provide. This updated new edition has been expanded to cover not only sources and methods that are well-established in History, such as archival research, but also those that have developed recently, such as the impact of digital history research. The themes of the different chapters have been selected to reflect new trends in the subject, including landscape studies, material culture and ethics. Every chapter presents new insights and perspectives and will open researchers minds to the expanding possibilities of historical research.

African Historical Studies Sep 17 2021 The twelve essays here brought together in one book are being accorded accessibility and permanence of a kind they have lacked as monographs or articles in journals. Written mostly in the last eight years in different circumstances, they are unified more in intent, in argument, and in perspective than in theme. Moreover, illustrations are heavily weighed in favour of English-speaking West Africa, in particular the areas that came under British colonial rule.

Teaching Global History Apr 24 2022 This updated edition of *Teaching Global History* challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why. This essential text explains how to organize curriculum around broad social studies concepts and themes, as well as student questions about humanity, history, and the contemporary world. All chapters feature lesson ideas, a sample lesson plan with activity sheets, primary source documents, and helpful charts, graphs, photographs, and maps. This new edition includes connections to the C3 framework, updates throughout to account for the many shifts in global politics, and a new chapter connecting past to present through current events and historical studies in ways that engage students and propel civic activism. Offering an alternative to pre-packaged textbook outlines and materials, this text is a powerful resource for promoting thoughtful reflection and debate on what the global history curriculum should be and how to teach it.

Geography and History Jul 16 2021 Alan Baker considers locational geographies and spatial histories, environmental geographies and environmental histories, landscape geographies and landscape histories, and regional geographies and regional histories. Seeking to bridge the "Great Divide" between history and geography, Baker identifies basic principles relating historical geography not only to history but also to geography, a reworking which signifies a "new beginning" for this scholarly hybrid.

Nature's Economy Dec 29 2019 *Nature's Economy* is a wide-ranging investigation of ecology's past, first published in 1994.

Nature Feb 20 2022 In an advertisement for water filter cartridges, we see a tumbling waterfall. The caption reads, "Like nature, Brita is beautifully simple." What kind of thinking is this? Is nature an objective reality that, in its beautiful simplicity, is unaffected by time, culture, and place? The word nature itself: what do we actually mean by it? These are some of the riveting questions examined by Peter Coates as he demonstrates that nature, like us, has a history of its own. Beginning with Roman times, Coates investigates the ideological and material factors that have influenced human perceptions of, attitudes toward, and uses of nature--notably religion and ethics, science, technology, economics, gender, and ethnicity. Nature is seen among its rich panoply of meanings as a physical place, as the collective phenomena of the world, as an essence or principle that informs the workings of the world, as an inspiration and guide for people and a source of authority governing human affairs, and as the conceptual opposite of culture. By examining these aspects of nature, Coates leads us on a spectacular tour of the central intellectual forces of Western civilization. The book is essential reading for those who seek an understanding of the history of ideas and the role of nature in that history. An Introduction to Book History Jun 26 2022 This is a comprehensive introduction to books and print culture which examines the move from the spoken word to written texts, the book as commodity, the power and profile of readers, and the future of the book in an electronic age.

The Routledge Companion to Management and Organizational History Jan 10 2021 The field of management and organizational history has reached a level of maturity that means an overview is long overdue. Written by a team of globally renowned scholars, this

comprehensive companion analyses management and organizational history, reflecting on the most influential periods and highlighting gaps for future research. From the impact of the Cold War to Global Warming, it examines the field from a wide array of perspectives from humanities to the social sciences. Covering the entire spectrum of the field, this volume provides an essential resource for researchers of business and management.

Deconstructing History Oct 07 2020 In *Deconstructing History*, Alun Munslow examines history in the postmodern age. He provides an introduction to the debates and issues of postmodernist history. He also surveys the latest research into the relationship between the past, history and historical practice as well as forwarding his own challenging theories. The book discusses issues of both empiricist and deconstruction positions and considers the arguments of major proponents of both stances, and includes: an examination of the character of historical evidence exploration of the role of historians discussion of the failure of traditional historical methods chapters on Hayden White and Michel Foucault an evaluation of the importance of historical narrative an up to date, comprehensive bibliography an extensive and helpful glossary of difficult key terms. *Deconstructing History* maps the philosophical field, outlines the controversies involved and assesses the merits of the deconstructionist position. He argues that instead of beginning with the past history begin with its representation by historians.

Doing History Jun 02 2020 "History as an academic discipline has dramatically changed

over the last few decades and has become much more exciting and varied as a result of ideas from other disciplines, the influence of postmodernism and historians' incorporation of their own theoretical reflections into their work. The way history is studied at university level can vary greatly from history at school or as represented in the media and *Doing History* bridges that gap. Aimed at students of history in their final year of secondary education or beginning degrees, this is the ideal introduction to studying history as an academic subject at university. "Doing History" presents the ideas and debates that shape how we "do" history today, covering arguments about nature of historical knowledge and the function of historical writing, whether we can really ever know what happened in the past, what sources historians depend on, and whether the historians' version of history has more value than popular histories. This practical and accessible introduction to the discipline introduces students to these key discussions, familiarises them with the important terms and issues, equips them with the necessary vocabulary and encourages them to think about, and engage with, these questions. Clearly structured and accessibly written, it is an essential volume for all students embarking on the study of history"--

Money, Markets, and Trade in Early Southeast Asia Mar 24 2022 This substantial work explores the impact of monetization in premodern Southeast Asia from the third century BCE to the rise of Maleka in the early fifteenth century. The author explores why concepts of money developed unevenly throughout the region. He considers trade policies, price controls, exchange ratios, monopolies, variant standards of value, and the administrative structures required to support such a complex economic innovation.

Globalization of Education Jul 04 2020 Continuing Joel Spring's reportage and analysis of the intersection of global forces and education, this text offers a comprehensive overview and synthesis of current research, theories, and models related to the topic. Spring introduces readers to the processes, institutions, and forces by which schooling has been globalized and examines the impact of these forces on schooling in local contexts. Designed for courses on globalization and education, international and comparative education, educational foundations, multicultural education, and educational policy, the text is written in a clear narrative style to engage readers in thoughtful consideration of topics discussed. Each chapter includes "Key Points" that summarize the content and suggest issues and

questions for critical analysis, discussion, and debate.

The Reign of Mary I Aug 24 2019 Until recently, the reign of Mary Tudor was generally seen as a 'sterile interlude' in the Tudor century, with Mary herself dismissed as 'Bloody Mary'. Extensive research in the past several decades has overturned these assumptions in almost every respect. In this succinct and up-to-date introduction to Mary's reign, Tittler and Richards provide new insight into the circumstances of Mary's accession and go on to show that her reign was a lot more stable, and her regime much more competent and innovative, than once believed. This fully revised third edition includes a diverse range of primary sources and sheds new light on a variety of topics, such as: · The complexities of Mary's relations with Philip of Spain · The restoration of Catholicism · The use of visual as well as literary means to legitimize and support Mary's rule · The context for the war with France This concise and thought-provoking introduction is ideal for students and interested readers at all levels.

Siam in Mind Jun 22 2019 This is an examination of Thailand's intellectual history - reflecting the thoughts of ordinary people as well as well-known thinkers - in Siam for the past 1300 years. It is a series of informal sketches, gleaned over years of historical research and stored away for rumination and reflection.

Never Pure Sep 29 2022 Steven Shapin argues that science, for all its immense authority

and power, is and always has been a human endeavor, subject to human capacities and limits. Put simply, science has never been pure. To be human is to err, and we understand science better when we recognize it as the laborious achievement of fallible, imperfect, and historically situated human beings. Shapin's essays collected here include reflections on the historical relationships between science and common sense, between science and modernity, and between science and the moral order. They explore the relevance of physical and social settings in the making of scientific knowledge, the methods appropriate to understanding science historically, dietetics as a compelling site for historical inquiry, the identity of those who have made scientific knowledge, and the means by which science has acquired credibility and authority. This wide-ranging and intensely interdisciplinary collection by one of the most distinguished historians and sociologists of science represents some of the leading edges of change in the scholarly understanding of science over the past several decades.

The Routledge Companion to Historical Studies Oct 31 2022 The Routledge Companion to Historical Studies provides a much-needed critical introduction to the major historians and philosophers together with the central issues, ideas and theories which have prompted the rethinking of history that has gathered pace since the 1990s. With twenty-nine new entries, and many that have been substantially updated, key concepts for the new history are examined through the ideas of leading thinkers such as Kant, Nietzsche, Croce,

Collingwood, White, Foucault and Derrida, and subjects range over class, empiricism, hermeneutics, inference, relativism and technology. New entries for the second edition include: Carl Becker Frank R. Ankersmit Jean-Francois Lyotard gender justified belief the aesthetic turn race film biography cultural history critical theory and experimental history. With a revised introduction setting out the state of the discipline of history today, as well as an extended and updated bibliography, this is the essential reference work for all students of history.

Contemporary Studies on Modern Chinese History Dec 21 2021 The study of modern Chinese history has developed rapidly in recent decades and has seen increased exploration of new topics and innovative approaches. Resulting from a special issue of Modern Chinese

History Studies, this set is devoted to showcasing the healthy development of Chinese modern history studies, and has already been revised twice in the original language. This three-volume set exhibits major achievements on the study of modern Chinese history and shows how the role of history was in debate, transformation, and re-evaluation throughout this tortuous yet prosperous period. Articles on 23 different topics are collected from over 30 prominent historians in order to represent their insights on the developmental paths of Chinese historical studies. Drawing on a large number of case studies of critical historical events that contribute to the establishment of the People's Republic of China, this set offers a panoramic view on the studies of modern Chinese history. In addition, it incorporates more pioneering topics such as intellectual history, cultural history, and translations of overseas studies on contemporary Chinese history. This book will be a valuable reference for scholars and students of Chinese history.

Historical Research Sep 25 2019 Historiography is the method of doing historical research, a potentially powerful tool in a social work historian or qualitative researcher's arsenal. As with other research methods, a historical study in social work must include a problem definition, a hypothesis, definition of the variables, gathering and analyzing historical evidence, and interpretation of the findings, with reliability and validity factored in throughout. This addition to the Pocket Guides to Social Work Research Methods guides doctoral students and researchers in the construction of a historical study, from problem

formulation to instrument construction to data collection and analysis.

The Oxford Handbook of Sports History Mar 31 2020 Practiced and watched by billions, sport is a global phenomenon. Sport history is a burgeoning sub-field that explores sport in all forms to help answer fundamental questions that scholars examine. This volume provides a reference for sport scholars and an accessible introduction to those who are new to the sub-field.

Family and Community in Early Modern Spain May 02 2020 James Casey offers an innovative study of prestige, power and the role of the family in a Mediterranean city during the early modern period. He focuses on the structure and values of the ruling class of Granada, where a new elite consolidated its authority. The study suggests that their power was linked to the pursuit of honour, which demanded participation in the politics of the

commonwealth and depended greatly on the network of personal relations which they were able to build with kinsmen, clients and patrons. It explores the way in which this system contributed to the relative tranquillity of the community during a turbulent time of religious and political change, that of the rise of absolutism and of the Counter Reformation. The book sheds fresh light on the nature of the early modern family and will be essential reading for historians of early modern Spain and Europe.
