The Cambridge CAE Course Sep 13 2021 Familiarises students thoroughly with the exam and extends their overall command of English.

Rigorous Curriculum Design Mar 19 2022 The need for a cohesive and comprehensive curriculum that intentionally connects standards, instruction, and assessment has never been more pressing. For educators to meet the challenging learning needs of students they must have a clear road map to follow throughout the school year. Rigorous Curriculum Design presents a carefully sequenced, hands-on model that curriculum designers and educators in every school system can follow to create a progression of units of study that keeps all areas tightly focused and connected.

Tutorial Distance Learning Feb 06 2021 Learning is a critical worldwide problem for humans, essential to create a peaceful and happy world. We have serious problems in learning in both wealthy and poor areas. New approaches to learning are needed, as the current system may not rise to the new challenges. This book proposes a new strategy for learning, worldwide and for all ages of students. Computer-based distance learning would be the major delivery mechanism, with very large numbers of students. The very frequent interactions between the student and the computer would be like that with a skilled human teacher. These interactions would take place in the student's native language, in both directions. A typical interaction would be a question to a student, and a free-form student response. Both voice and keyboard student input would be possible. The learning programs would work with each student until mastery is achieved, adapting to the needs of each. Students would be active learners. The book begins with the problems and goals of learning. It considers possible forms of distance learning, looking at the variables involved, current examples of distance learning, and possible future forms including examples from science fiction. It then investigates student interactions, considering both frequency of interactions and the quality of each interaction. Programs developed in the Educational Technology Center at the University of California, Irvine, illustrate the critical idea of tutorial learning with computers. Production of tutorial learning material and costs for a student hour of learning is discussed. The book ends

with suggestions for future progress. Current hardware and software is fully adequate for the tasks described. Development of all required learning units is a major activity. After this development, both better quality of learning and lower costs are very likely. Further experimental work is essential to understand the possibilities.

A Workbook in Child Psychology May 21 2022

Edexcel AS Psychology Student Unit Guide New Edition: Unit 2 Understanding the Individual Aug 20 2019 Written by a senior examiner, Christine Brain, this Edexcel AS Psychology Student Unit Guide is the essential study companion for Unit 2: Understanding the Individual. This full-colour book includes all you need to know to prepare for your unit exam: clear guidance on the content of the unit, with topic summaries, knowledge check questions and a quick-reference index examiner's advice throughout, so you will know what to expect in the exam and will be able to demonstrate the skills required exam-style questions, with graded student responses, so you can see clearly what is required to get a better grade

AS Film Studies Unit 3 Mar 27 2020 Student Unit Guides are perfect for revision. Each guide is written by an examiner and explains the unit requirements, summarises the relevant unit content and includes a series of specimen questions and answers. A Content Guidance section combines an overview of the specific unit or module and the key terms and concepts, with an examiner's interpretation so that students understand precisely what they need to understand and learn, the skills required and the potential pitfalls. A Question and Answer section provides graded answers, typically A and C, to questions which have been set to reflect the style of the unit. All responses are accompanied by commentaries which highlight their respective strengths and weaknesses, giving students an insight into the mind of the examiner.

Free Learning Jun 10 2021 This edited volume explores, investigates and analyses Free Learning – an innovative approach to student-directed learning which seeks to challenge educational norms from within. The volume is framed by a recognition of the urgent need for transformation of our educational systems. In traditional education, students work through a teacher-directed linear syllabus, at a pace dictated by the teacher, with summative assessment hurdles at too-frequent intervals. Progression and direction are determined solely by the teacher. In Free Learning, students determine their own learning pathway through a non-linear syllabus, which can be visualised as a mind map. Students may then complete as many units as they either have time for, or are interested in, moving from one unit to another on the basis of having formatively satisfied the demands of each individual unit. This volume showcases the value and potential of Free Learning in contemporary practice, and is intended to bridge theory and practice. The structure of the book reflects this complementary fit, with contributions from practitioners describing Free Learning as a learning and teaching tool in a range of educational settings, subjects and age-ranges. It also contains qualitative and quantitative analyses by researchers exploring the uptake of Free Learning and students' responses to the methodology. Researchers and educators who are interested in student-directed methodologies, especially in Asia, will find that the practical accounts and analyses of Free Learning contained within, provide much food for thought with regard to redefining student learning.

English for Academic Study: Speaking 2012 Edition Jan 05 2021 English for Academic Study: Speaking This fully updated 2012 edition of English for Academic Study: Speaking will help your students develop the speaking and presentation skills they need to participate effectively in academic seminars and discussions. The units are based on the following topics: Being a successful student Learning online Changing roles in the family A healthy lifestyle The influence of the media The world of work Protecting the environment Science and the paranormal Studying in a new environment Each unit includes discussions and presentations that relate to the topic of the unit. The written and listening texts will give your students different perspectives on the topic and provide evidence to support their ideas – one of the essential features of academic life. There is also a learner diary at the

end of each unit to help students think about the process of learning and the strategies they are developing. The Course Book includes unit summaries to give students a quick overview of what they have covered, and a comprehensive glossary of terms. Each unit also has weblinks offering additional information and activities, relating to both speaking skills and the topics covered in the units. This book can be used in conjunction with the following books in the English for Academic Study (EAS) series, also published by Garnet Education: EAS: Reading, EAS: Writing, EAS: Extended Writing & Research Skills, EAS: Listening, EAS: Vocabulary, EAS: Pronunciation and EAS: Grammar for Writing.

Childhood and Youth Studies Feb 24 2020 This book introduces the inter-disciplinary study of childhood and youth and the multi-agency practice of professionals who serve the needs of children, young people and their families. Exploring key theories and central ideas, research methodology, policy and practice, it takes a holistic, contextual approach that values difference and diversity. It examines concepts such as identity, representation, creativity and discourse and issues such as ethnicity, gender and the 'childhood in crisis' thesis. Furthermore, it challenges opinion by exploring complex and controversial modern-day issues, and by engaging with a range of perspectives to highlight debates within the field.

Study Skills in English Student's Book Jan 25 2020 This is a complete course in study skills for students in further and higher education institutions. Skills taught include: improving reading efficiency; note-taking; preparing for seminars; research techniques; essay organisation and presentation; exam preparation. One unit also deals with the social aspects of studying in Britain. The emphasis is on student activity and realistic practical work. To make the course as flexible as possible, suggestions are given in the Tutor's Book for 'full time' and 'minimum time' allocations within each unit. Full time allocations give about 90 classroom hours; the shorter programme can be completed in about 50 hours. The Tutor's Book also provides suggestions for further reading and answers to the exercises. Answers are also given in the Student's Book, so making it possible for most of the course to be used for individual study. The cassette recording contains the lecture material for Unit 3 Taking Notes.
