Updated in its 4th edition, *Global Issues* is a current and topical look at the forces driving globalization. From democratization, human rights, and global finance to terrorism, pandemics, and climate change, this text surveys global problems that transcend boundaries and are challenging the international system. This is the only text of its kind to place complex issues into comprehensive context and thus explain the growing political, economic, and cultural interdependence visible in the headlines and in readers' lives.

[Global Gender Issues](#) Sep 13 2021 When we look at world politics through a different set of lenses—ones that reveal how the power of gender blinds us to the presence of women in international affairs—we begin to see what lies below the surface of the interstate power exchanges called international relations. Some women wield traditional international power as heads of state. There are also women in positions of less visible state and nonstate power, many of whom seek a more equal and just global order. And there are billions of women who bear, feed, clothe, and care for the world—whether as mothers, farmers, textile workers, electronics assemblers—yet have no formal political power. *Global Gender Issues* connects the inequalities between women and men with the “world politics” of power, security, economy, and ecology. Through history, visual imagery, theoretical analysis, and other narrative techniques, V. Spike Peterson and Anne Sisson Runyan alert us to gendered differences of power, violence, labor, and resources. In doing so, they suggest linkages between and among so-called women's issues and such world political matters as wars of secession, arms proliferation, global economic recession, and environmental degradation. At the same time, the

authors hold out for us a clearly articulated, undogmatic hope for redefining and reorganizing gender relations and international relations as we begin to embrace difference, demand equality, and develop new standards of power and progress.

Global Gender Issues in the New Millennium Jun 10 2021 Global Gender Issues in the New Millennium argues that the power of gender works to help keep gender, race, class, sexual, and national divisions in place despite increasing attention to gender issues in the study and practice of world politics. Accessible and student-friendly for both undergraduate and graduate courses, authors Anne Sisson Runyan and V. Spike Peterson analyze gendered divisions of power and resources that contribute to the worldwide crises of representation, violence, and sustainability. They emphasize how hard-won attention to gender equality in world affairs can be co-opted when gender is used to justify or mystify unjust forms of global governance, international security, and global political economy. In the new and updated fourth edition, Runyan and Peterson examine the challenges of forging transnational solidarities to de-gender world politics, scholarship, and practice through renewed politics for greater representation and redistribution. Yet they see promise in coalitional struggles to re-radicalize feminist world political demands to change the downward conditions of women, men, children, and the planet. Updated to include framing questions at the opening of each chapter, discussion questions and exercises at the end of each chapter, and updated data on gender statistics and policymaking. Chapters One and Two have also been revised to provide more support to readers with less of a background in gender politics. Case studies and web resources are now also provided.

United Nations at the Millennium Jun 17 2019 This book provides unparalleled coverage of each of the principal organs of the United Nations. This collection offers a survey of the life of each organ since its inception in 1945, the extent to which it has fulfilled its founding mission, and proposals for reform. As well as providing comprehensive coverage of the present role of this highly influential organization, the book addresses larger questions about the role of the U.N. and the fitness for purpose of its principal organs as a means to global governance.

The Fourth Industrial Revolution Feb 18 2022 The founder and executive chairman of the World Economic Forum on how the impending technological revolution will change our lives We are on the brink of the Fourth Industrial Revolution. And this one will be unlike any other in human history. Characterized by new technologies fusing the physical, digital and biological worlds, the Fourth Industrial Revolution will impact all disciplines, economies and industries - and it will do so at an unprecedented rate. World Economic Forum data predicts that by 2025 we will see: commercial use of nanomaterials 200 times stronger than steel and a million times thinner than human hair; the first transplant of a 3D-printed liver; 10% of all cars on US roads being driverless; and much more besides. In *The Fourth Industrial Revolution*, Schwab outlines the key technologies driving this revolution, discusses the major impacts on governments, businesses, civil society and individuals, and offers bold ideas for what can be done to shape a better future for all.

Understanding Global Security Jun 22 2022 Fully revised to incorporate recent developments, this fourth edition of *Understanding Global Security* analyses the variety of ways in which people's lives are threatened and/or secured in contemporary global politics. The traditional focus of Security Studies texts: war, deterrence and terrorism, are analysed alongside non-military security issues such as famine, crime, disease, disasters, environmental degradation and human rights abuses to provide a comprehensive survey of how and why people are killed in the contemporary world. This new edition features: Greater coverage of the evolving theoretical literature on security, including more analysis of critical theory perspectives and emerging schools of thought. Reflections on recent developments in the conflicts in Syria and Ukraine. New data and cases on poverty, hunger and depression and greater analysis of the social and political implications of the prolonged period of stagnation the global economy has gone through. New content reflecting the recent resurgence in populist nationalism evident in the election of Trump in the USA, the UK's exit from the EU and the authoritarian turn taken in many countries. Analysis of the 2015 Paris climate change treaty and the international responses to recent pandemics such as Ebola and Zika A new section has been included on suicide, plugging a gap evident in the earlier editions. User-friendly and easy to follow, this highly acclaimed and popular academic textbook is designed to make a complex subject accessible to all and will continue to be essential reading for everyone interested in security.

American Trade Politics, 4th Edition Feb 24 2020 In this comprehensive revision of the most influential, widely read analysis of the US trade policymaking system, Destler addresses how globalization has reshaped trade politics, weakening traditional protectionism but intensifying concern about trade's societal impacts. Entirely new chapters treat the deepening of partisan divisions and the rise of "trade and..." issues (especially labor and the environment). The author concludes with a comprehensive economic and political strategy to cope with globalization and maximize its benefits. The original edition of *American Trade Politics* won the Gladys Kammerer Award of the American Political Science Association for the best book on US national policy.

Proceedings of the 4th International Conference on Economic Management and Green Development Nov 22 2019 The proceedings shed light on selected topics including economic management, public administration, and green development. Featuring scholarly works from the 4th International Conference on Economic Management and Green Development (ICEMGD 2021), this volume of proceedings showcases the papers composed with regard to a diverse range of topics situated at the intersecting field of Economic Management, Public Administration and Green Development. Arising as the top concern of the global community, issues of green development impose challenges for the academia to bridge the interdisciplinary prowess in tackling the gap of knowledge within concerned fields. ICEMGD 2021 is an annual conference initiated by the year of 2017 under the goal of bringing together intellectuals from economics, business management, public administration, and otherwise related spheres for the share of research methods and theoretical breakthroughs. The aim of the proceeding volume is for the integration of social scientific research methods with research into alarming development issues. The ICEMGD 2021 seeks to

promote joint initiatives among well-established fields like macro- and microeconomics, international economics, finance, agricultural economics, health economics, business management and marketing strategies, regional development studies, social governance, and sustainable development. Featuring interdisciplinary contributions, this book will be of interest to researchers, academics, professionals and policy makers in the field of economic management, public administration, and development studies.

Global Issues in Banking and Finance Aug 24 2022 This volume presents current developments in the fields of banking and finance from an international perspective. Featuring contributions from the 4th International Conference on Banking and Finance Perspectives (ICBFP), this volume serves as a valuable forum for discussing current issues and trends in the banking and financial sectors, especially in light of the global economic challenges triggered by financial institutions. Using the latest theoretical models, new perspectives are brought to topics such as international banking and finance, Islamic banking, fintech, and corporate finance. Offering an opportunity to explore the challenges of a rapidly changing industry, this volume will be of interest to academics, policy makers, and scholars in the fields of banking, insurance, and finance.

Global Health 101 Sep 20 2019 Rated by an independent panel as the best introductory Global Health text for undergraduates, *Global Health 101, Third Edition* is a clear, concise, and user-friendly introduction to the most critical issues in global health. It illustrates key themes with an extensive set of case studies, examples, and the latest evidence. Particular attention is given to the health-development link, to developing countries, and to the health needs of poor and disadvantaged people. The Third Edition is a thorough revision that offers an extensive amount of new and updated information, while maintaining clarity, simplicity, and ease of use for faculty and students. Offering the latest data on the burden of disease, the book presents unique content on key topics that are often insufficiently covered in introductory materials, such as immunization and adolescent health.

Analyzing Global Environmental Issues Feb 06 2021 This book includes chapters by experts proposing game theoretical solutions and applying experimental design to a variety of social issues related to global and international conflicts over natural resources and the environment. The focus of the book is on applications that have policy implications, relevance and, consequently, could lead to the establishment of policy dialogue. The chapters in the book address issues that are global in nature, such as international environmental agreements over climate change, international water management, common pool resources, public goods, international fisheries, international trade, and collective action, protest, and revolt.

International Economics: Global Markets And Competition (4th Edition) Jul 11 2021 *International Economics: Global Markets and Competition* integrates the microeconomics of international trade with open economy macroeconomics and finance. The theory is comprehensive but presented with intuitive diagrams. The book emphasizes the gains from international competition and the limits of trade policy. Economics began during the Industrial Revolution with a debate over import tariffs. To this day, domestic industries lobby for tariff protection against foreign competition, paying lawmakers for tariffs on imports. Only under special conditions do tariffs lead to economic gains. Domestic importers of materials and industrial products favor free trade, as do export industries since tariffs encourage other countries to retaliate with tariffs of their own. Trade theory includes market analysis and general equilibrium models of the economy. This text integrates the full range of trade theory with exchange rates, balance of payments, international finance, and open economy growth and macroeconomics. The presentation focuses on diagrams and avoids equations and algebra. The theory is presented with numerical examples. The text does not assume intermediate economics, instead developing the theory with thorough explanations. Questions in each section build confidence in applying the theory. Boxed examples illustrate the importance of the theory. Students like the concise and straightforward style. Instructors notice the difference on exams.

Global Problems Jul 23 2022 Scott Sernau's clear writing and vivid examples help readers to understand their role as global citizens. Part one begins with the challenges of inequality in life chances, wages and work, and gender and education; inequality lies at the heart of many global problems. Part two focuses on conflict and violence—from crime to politics, terrorism to war—with an emphasis on connections of violence to social justice and human rights. Part three looks at sustainability and the problems of urbanization, crowding, and environmental destruction. Each chapter begins with a "Global Encounters" vignette that provides examples of college students encountering striking situations and being asked to think about broader implications. Though people across the globe lead seemingly very different lives, the author emphasizes interconnectedness, with discussions of the local-global connection. Chapters explore social problems by considering key theories, both classical and contemporary, and by providing enough history to understand the background of contemporary issues. The book's approach is both multinational and multidisciplinary. Chapters conclude with positive possibilities for global change. While problems are substantial, many people are working to make a difference, and this book offers an invitation to participate. In addition to "Key Ideas" and "For Review and Discussion," every chapter concludes with "Making Connections" that offers reliable websites for more information and "Making a Difference," which provides options for involvement. These sections can form the basis for assignments, for further study, or for class or group projects.

The BRICS and Beyond Dec 24 2019 The world is in an era of great transformations. Globalization, transnational capitalism, September 11, the 2008 global financial crises, and the emergence of the 'second world' in general and the BRICS in particular are characterized by a diffusion of power away from the traditional North Western powers and towards the global South. Such great transformations have reshaped the terrain and parameters of social, economic and political relations both at the national and the global levels and have exerted pressure on the exiting international order in terms of both opportunities and constraints. This new era also urges the need for re-conceptualizing the changing world order especially with regard to one of the core conceptual categories and analytical apparatus in the studies of IR and IPE - hegemony. The world will witness a new era of interdependent hegemony, in which both the existing 'First World' and the emerging 'Second World' are intertwined in a constant process of shaping and reshaping the international order in the nexus of national interest, regional orientation, common economic and political agenda, political alliance and potential conflicts. This collection juxtaposes, from different perspectives and approaches, the discussion on the political economy of the emerging world order with a focus on the rising powers.

The Global Business Environment Dec 16 2021 The new edition of this bestselling textbook provides a comprehensive introduction to the business environment, coherently integrating cross-disciplinary topics from sociology, politics and economics. No Ordinary Disruption Apr 08 2021 Our intuition on how the world works could well be wrong. We are surprised when new competitors burst on the scene, or businesses protected by large and deep moats find their defenses easily breached, or vast new markets are conjured from nothing. Trend lines resemble saw-tooth mountain ridges. The world not only feels different. The data tell us it is different. Based on years of research by the directors of the McKinsey Global Institute, *No Ordinary Disruption: The Four Forces Breaking all the Trends* is a timely and important analysis of how we need to reset our intuition as a result of four forces colliding and transforming the global economy: the rise of emerging markets, the accelerating impact of technology on the natural forces of market competition, an aging world population, and accelerating flows of trade, capital and people. Our intuitions formed during a uniquely benign period for the world economy—often termed the Great Moderation. Asset prices were rising, cost of capital was falling, labour and resources were abundant, and generation after generation was growing up more prosperous than their parents. But the Great Moderation has gone. The cost of capital may rise. The price of everything from grain to steel may become more volatile. The world's labor force could shrink. Individuals, particularly those with low job skills, are at risk of growing up poorer than their parents. What sets *No Ordinary Disruption* apart is depth of analysis combined with lively writing informed by surprising, memorable insights that enable us to quickly grasp the disruptive forces at work. For evidence of the shift to emerging markets, consider the startling fact that, by 2025, a single regional city in China—Tianjin—will have a GDP equal to that of the Sweden, of that, in the decades ahead, half of the world's economic growth will come from 440 cities including Kumasi in Ghana or Santa Carina in Brazil that most executives today would be hard-pressed

to locate on a map. What we are now seeing is no ordinary disruption but the new facts of business life— facts that require executives and leaders at all levels to reset their operating assumptions and management intuition.

Global Logistics and Supply Chain Management Nov 03 2020 Global Logistics and Supply Chain Management is a comprehensive, fully up-to-date introduction to the subject. Addressing both practical and strategic perspectives, this revised and updated fourth edition offers readers a balanced and integrated presentation of Logistics and Supply Chain Management (LSCM) concepts, practices, technologies, and applications. Contributions from experts in specific areas of LSCM provide readers with real-world insights on supply chain relationships, transport security, inventory management, supply chain designs, the challenges inherent to globalization and international trade, and more. The text examines how information, materials, products, and services flow across the public and private sectors and around the world. Detailed case studies highlight LSCM practices and strategies in a wide range of contexts, from humanitarian aid and pharmaceutical supply chains to semi-automated distribution centers and port and air cargo logistics. Examples of LSCM in global corporations such as Dell Computer and Jaguar Land Rover highlight the role of new and emerging technologies. This edition features new and expanded discussion of contemporary topics including sustainability, supply chain vulnerability, and reverse logistics, and places greater emphasis on operations management.

Green Planet Blues Dec 04 2020 Revised and updated throughout, this unique anthology examines global environmental politics from a range of perspectives: contemporary and classic, activist and scholarly, and reflecting voices of the powerless and powerful. Paradigms of sustainability, environmental security, and ecological justice illustrate the many ways environmental problems and their solutions are framed in contemporary international debates about climate, water, forests, toxics, energy, food, biodiversity, and other environmental challenges of the twenty-first century. Organized thematically, the selections offer a truly global scope. Fourteen new readings discuss globalization and environmental change; transnational activist networks; the UN Environment Programme; environment-conflict linkages, including the case of Darfur; environmental peacebuilding; the debate on greening foreign aid; and the linkages between climate change and human rights. This book stresses the underlying questions of power, interests, authority, and legitimacy that shape environmental debates, and it provides readers with a global range of perspectives on the critical challenges facing the planet and its people.

Introduction to Political Psychology Jan 05 2021 The first comprehensive textbook on political psychology, this user-friendly volume explores the psychological origins of political behavior. Using psychological concepts to explain types of political behavior, the authors introduce a broad range of theories and cases of political activity to illustrate the behavior. The book examines many patterns of political behaviors including leadership, group behavior, voting, race, ethnicity, nationalism, political extremism, terrorism, war, and genocide. Text boxes highlight current and historical events to help students see the connection between the world around them and the concepts they are learning. Examples highlight a variety of research methodologies used in the discipline such as experimentation and content analysis. The "Political Being" is used throughout to remind the reader of the psychological theories and concepts to be explored in each chapter. Introduction to Political Psychology explores some of the most horrific things people do to one another for political purposes, as well as how to prevent and resolve conflict, and how to recover from it. The goal is to help the reader understand the enormous complexity of human behavior and the significant role political psychology can play in improving the human condition. Designed for upper division courses on political psychology or political behavior, this volume also contains material of interest to those in the policymaking community.

International Studies May 21 2022 This core text is the first to provide a much-needed interdisciplinary approach to international studies. Emphasizing the interconnected nature of history, geography, anthropology, economics, and political science, International Studies details the methodologies and subject matter of each discipline then applies these discipline lenses to seven regions: Europe; East Asia and the Pacific; South and Central Asia; sub-Saharan Africa; the Middle East and North Africa; Latin America; and North America. This disciplinary and regional combination provides an indispensable, cohesive framework for understanding global issues. The fully updated fourth edition includes four new global issues chapters: The Refugee Crisis in Europe; The Syrian Civil War and the Rise of the Islamic State; Global Climate Change; and The Globalization of Modern Sports. .

Comparative Education Mar 07 2021 Provides new perspectives on the dynamic interplay of global, national, and local forces as they shape the functions and outcomes of education systems. The book calls for a rethinking of the nation-state as the basic unit for analyzing school-society relations and emphasizes the need to study social movements in relation to educational reforms.

The 4th Industrial Revolution Oct 02 2020 This book helps decision makers grasp the importance, and applicability to business, of the new technologies and extended connectivity of systems that underlie what is becoming known as the Fourth Industrial Revolution: technologies and systems such as artificial intelligence, machine learning, 3D printing, the internet of things, virtual and augmented reality, big data and mobile networks. The WEF, OECD and UN all agree that humanity is on the cusp of the Fourth Industrial Revolution. As intelligent systems become integrated into every aspect of our lives this revolution will induce cultural and societal change of a magnitude hitherto unforeseen. These technologies challenge the values, customer experience and business propositions that have been the mainstay of almost every business and organization in existence. By redefining and encapsulating new value structures with emerging intelligent technologies, new innovative models are being created, and brought to market. Understanding the potential and impact of these changes will be a fundamental leadership requirement over the coming years. Skilton and Hovsepian provide decision makers with practical, independent and authoritative guidance to help them prepare for the changes we are all likely to witness due to the rapid convergence of technological advances. In short, bite-sized, nuggets, with frameworks supported by a deep set of practical and up-to-the-minute case studies, they shine light on the new business models and enterprise architectures emerging as businesses seek to build strategies to thrive within this brave new world.

The Social Construction of Global Corruption Apr 27 2020 This book offers new ways of thinking about corruption by examining the two distinct ways in which policy approaches and discourse on corruption developed in the UN and the OECD. One of these approaches extrapolated transnational bribery as the main form of corrupt practices and advocated a limited scope offense, while the other approach tackled the broader structure of the global economic system and advocated curbing the increasing power of multinational corporations.

Developing nations, in particular Chile, initiated and contributed much to these early debates, but the US-sponsored issue of transnational bribery came to dominate the international agenda. In the process, the 'corrupt corporation' was supplanted by the 'corrupt politician', the 'corrupt public official' and their international counterpart: the 'corrupt country'. This book sheds light on these processes and the way in which they reconfigured our understanding of the state as an economic actor and the multinational corporation as a political actor.

Global Issues Jan 17 2022 From democratization, human rights, and global finance to terrorism, pandemics, and climate change, *Global Issues* is a current and topical look at the forces driving globalization. This text looks at global problems that transcend boundaries and are challenging the international system. For global issues or international relations courses, this is the only text of its kind to place complex issues into comprehensive context and thus explain the growing political, economic, and cultural interdependence visible in the headlines and in students' lives.
